

ARCHITECT

Mark Morley

Architect – Browne Smith Baker

“My practice specialise in educational projects and particularly Universities. I worked with S+B at the Institute of Ageing Health for The University of Newcastle. We were completely satisfied with the quality of lab furniture and fume cupboards supplied and were impressed with the way in which the project was managed from initial design to final commissioning. On time, to a good standard and nothing too much trouble even when we wanted to make changes late in the process”
