

ARCHITECT

Ian Henderson

Architect – Devereux/DEWJOC Partnership

“I have carried out a number of lab projects over the years and have worked with several different suppliers in the field. The installation of lab furniture has many difficult building fabric, mechanical and electrical services interfaces that are not always readily appreciated. S+B showed a better appreciation than many in regard to these threats to a project and was able to take a lead in helping our contracts to a successful conclusion. I would have no hesitation in using S+B again”
