Dear Sirs

S & B UK Limited has supplied and installed approximately £1.4M worth of laboratory furniture for the Alfred Denny Building Project at the University of Sheffield. The project involved close coordination with the Project Design Team along with numerous other trades on site.

The University is very pleased with both the quality of the product and with the performance of S & B UK Limited on site during the installation, they were mindful of the end users requirements whilst adhering to a specific programme of works for installation.

We feel that the quality of S & B UK Limited's furniture and service compares very favourable with similar products installed at the University and we would have no hesitation in recommending S & B UK Limited to future potential clients.

Yours faithfully

Terry Shepherd
Principal Clerk of Works
and Health & Safety Manager
