Dear Paul

The S&B Group undertook a series of laboratory fit outs to Bolton Sixth Form College. The design and coordination with the M&E installation was developed into working drawings taking into account comments from the architect and client. The design was professionally presented in a CAD format which could be distributed via a EDMS

The manufactured furniture arrived on programme and was installed in accordance with the agreed programme and sequence. The installation was managed effectively and efficiently and handed over to agreed phased programme. The furniture was commissioned and put into use by the client with only minor issues in use.

I would have no hesitation in recommending the S&B Group for similar educational laboratory works.

Yours sincerely
BAM Construction Limited - North West

Lee Benson
Project Manager
